

# TURKEY'S LEADING SOLAR TRACKER MANUFACTURER

## SINGLE AXIS SOLAR TRACKER REMAK SOLAR ST7 DC

Solar Tracker St7 model is a model that is accepted worldwide and is referred to as a 7 inch solar tracker in single axis tracking systems. Due to its programming capability, it is a system that can be driven by a DC motor. Thanks to the gripper arms in the reducer, it is possible to quickly connect 120x120 profiles, which are frequently used in current projects.

### PATENTED GEAR DESIGN

Mechanical-automatic stop feature that works at a certain angle and prevents the panels from falling in case of any accident due to wind or any other conditions.

More than 9 types of Solar Tracker Systems.  
and 52 other gearbox types.
